Work Experience

- Sep 2024 – Present **Staff Software Engineer**, *Forma*, New York, NY, *The flexible benefits platform for global companies.*
- Led Forma's bank partner migration across 67,000 members and \$38MM in balances; built the migration and reset API endpoints, handled account and card creation for migrated members and executed the transfer of all funds to the new bank.
 - Designed and built Forma's first post-tax ledger using double-entry accounting; it now holds 30 million+ accounts and processed 11 million+ transactions in its first year.
 - Serve as engineering point of contact for Forma's banking partners, driving process changes across operations; designed a new member offboarding flow with our bank partners and ops team that removed engineering from routine offboardings.
 - Designed and built an invoicing service that translates finance-team invoices and payments into ledger entries, giving real-time visibility into customer cash.
- Aug 2021 – Aug 2024 **Senior Software Engineer II**, *Orum.io*, New York, NY, *The simplest API for instant payouts.*
- Implemented Orum's automated KYC (know your customer) system, which processed hundreds of thousands of applications and enabled ongoing compliance monitoring.
 - Built a direct-to-Fed ACH connection, generating and submitting ACH files and processing Fed responses.
 - Designed and built additional banking integrations, including ACH APIs from multiple banks and an ISO20022 RTP connection; all together these integrations moved hundreds of millions of dollars.
- Oct 2019 – Aug 2021 **Senior Software Engineer**, *Store No. 8 / Walmart New Product Innovation*, New York, NY.
- Built and launched Smart Reorder, Walmart's first AI-powered grocery service, to public beta. Smart Reorder learns customers' grocery habits and places orders automatically before they run out.
 - Designed the automated checkout system that places orders on customers' behalf, plus the backend APIs for account status, cart, and checkout preferences.
 - Migrated 6 microservices to Walmart Cloud Native Platform (WCNP), Walmart's new internal cloud platform.
- Jan 2017 – Sep 2019 **Associate Software Engineer**, *ZOLL LifeVest*, Pittsburgh, PA, *The world's first wearable defibrillator.*
- Co-developed the device-to-cloud data pipeline for the next-generation LifeVest, including the on-device API that collects and transmits patient data and the cloud endpoints that route it into the data lake.
 - Maintained and extended software for the current-generation LifeVest, a regulated medical device worn by patients.
 - Served as Scrum Master for my team, running sprint planning, standups, and retros.

Earlier Experience

- Aug 2016 – Dec 2016 **CERT Intern**, *Carnegie Mellon University-Software Engineering Institute*, Pittsburgh, PA.
- Jun 2016 – Aug 2016 **Technology Summer Analyst Program**, *BNY Mellon - iFX Platform*, Pittsburgh, PA.
- Sep 2013 – May 2016 **Student Tech Crew**, *University of Pittsburgh School of Pharmacy*, Pittsburgh, PA.
- May 2014 – Dec 2015 **Test Engineering Co-op (3 rotations)**, *ZOLL LifeVest*, Pittsburgh, PA.

Education

- Aug 2012 – Dec 2016 **Bachelor of Science in Computer Engineering**, *University of Pittsburgh*, Pittsburgh, PA.
GPA: 3.275

Notable Experience

- Jan 2014 – Dec 2016 **Theta Tau**, *Member*, Professional Engineering Fraternity.
- April 2012 **Eagle Scout**, *Boy Scouts of America*.
